

Mission & Vision

Mission: To improve the delivery of medical care to acutely ill children and ultimately improve survival from acute illness in the pediatric population.

Vision: To bring together all individuals working in pediatric simulation-based research to shape and mold the future of pediatric simulation research by answering important questions pertaining to resuscitation, technical skills, behavioral skills, debriefing and simulation-based education.

History

The INSPIRE Network is the International Network for Simulation-based Pediatric Innovation, Research, and Education. INSPIRE was formed in 2011 from a large group of pediatric simulation-based researchers from a variety of disciplines and specialties looking to improve collaboration, mentorship, and productivity. We merged two large-scale existing pediatric simulation research networks, EXPRESS and POISE, into INSPIRE in 2011.

Organizational Structure

This process has brought down the walls between institutions through shared resources and a mutual understanding of each other's work towards a common goal. Our work has

helped synergize ongoing projects in overlapping domains. We are not a formal academic society; rather, we are a bottom-up, grassroots organization that has formed to meet the needs of the rapidly changing landscape of pediatric simulation research. The network has been extremely productive in advancing and guiding simulation-based research activities. We provide a structure and process of mentorship to junior investigators. Resources to our members include an online database of ongoing studies and investigators, access to a research coordinator, librarian and statistician, online data sharing infrastructure (video, survey, database management) and a manuscript oversight committee for pre-publication review.

Executive & Scientific Review Committees

INSPIRE is led by a diverse and inter-professional executive committee from institutions across the globe.

In the spirit of promoting new ideas and offering opportunities for researchers to grow within the Network, in 2017 the INSPIRE Network held an election to introduce new members to the INSPIRE Executive Committee and INSPIRE Scientific Review Committee.

We would like to extend a warm thank you to our founding Executive Members for sharing their knowledge and expertise with the INSPIRE Network community and for their continuing contributions to the INSPIRE Network.

INSPIRE NETWORK REPORT

2016-2017

Current Executive Committee Members

Mark Adler, MD,
Northwestern University
& Ann & Robert H. Lurie
Children's Hospital of
Chicago, USA

**Marc Auerbach MD,
MSc (Senior Chair)**
Yale University & Yale
New Haven Children's
Hospital, USA

**Jennifer Arnold, MD,
MSc, FAAP,**
Johns Hopkins All
Children's Hospital, USA

**Aaron Calhoun, MD,
FAAP, FSSH,**
University of Louisville
& Norton Children's
Hospital, USA

**Adam Cheng MD, (Co-
Chair)**
University of Calgary &
Alberta Children's
Hospital, Canada

**Jonathan Duff, Bsc
(Hon), MD, MEd, FRCPC,**
University of Alberta &
Stollery Children's
Hospital, Canada

David Grant, MD
University of Bristol &
Bristol Royal Hospital for
Children, UK

**David Kessler, MD, MSc,
(Co-Chair)**
Columbia University &
New York-Presbyterian/
Morgan Stanley Children's
Hospital, USA

Kimberly Stone, MD
University of
Washington &
Seattle Children's
Hospital, USA

Travis Whitfill, MPH
Yale University, USA

Current Scientific Review Committee

Aaron Calhoun, MD, Kosair Children's / U of Louisville, KY (Chair); Linda Brown, MD, Hasbro Children's / Brown University; Isabel Gross, MD, Yale University; Chris Kennedy, MD, Children's Mercy; Akira Nishisaki, MD, Children's Hospital of Philadelphia; Frank Overly, MD, Hasbro Children's / Brown University; Nancy Tofil, MD, Children's Hospital Alabama

Founding Executive Committee Members

- Co-chairs: Adam Cheng MD, Alberta Children's Hospital, Canada; Marc Auerbach MD, MSc, Yale University, USA
- Research chair: David Kessler MD, MSc, Columbia University, USA
- International chair: Ralph Mackinnon MD, Royal Manchester Children's Hospital, UK
- Technology chairs: Todd Chang MD, Children's Hospital of LA, USA; Jordan Duval-Arnould, Johns Hopkins University, USA
- Manuscript Oversight Committee Chair: Vinay Nadkarni MD, Children's Hospital of Philadelphia, USA
- Senior co-chairs: Elizabeth Hunt MD, PhD, Johns Hopkins University, USA; Martin Pusic MD, PhD, New York University School of Medicine, USA
- Network Manager: Nicola Peiris, BSc., Alberta Children's Hospital, Canada

L to R: Adam Cheng, Ralph MacKinnon, Nicola Peiris, Betsy Hunt, Vinay Nadkarni, Marc Auerbach, David Kessler, Jordan Duval-Arnould, Todd P Chang. Missing: Martin Pusic

Founding Research Committee Members

David Kessler (Chair), MD, Columbia University; Jonathan Duff, MD, Stollery Children's Hospital; Nancy Tofil MD, Children's Hospital Alabama; Aaron Calhoun, MD, Kosair Children's Hospital; Akira Nishisaki, MD, Children's Hospital of Philadelphia; Frank Overly, MD, Hasbro Children's Hospital; Linda Brown, MD, Hasbro Children's Hospital; Mark Adler, MD, Lurie Children's Hospital

INSPIRE NETWORK REPORT

2016-2017

INSPIRE Network Funding and Partners

INSPIRE would like to acknowledge the support of partners who have provided infrastructure funding, in-kind support, and/or loaner equipment for INSPIRE network studies.

The Laerdal Foundation
for Acute Medicine

INSPIRE would also like to thank the Society for Simulation in Healthcare and the International Paediatric Simulation Society for provided meeting space and food to support INSPIRE network meetings at their respective annual conferences.

Lastly, INSPIRE would like to acknowledge the support of an anonymous individual whose generous donation will support network activities over the next 3 years.

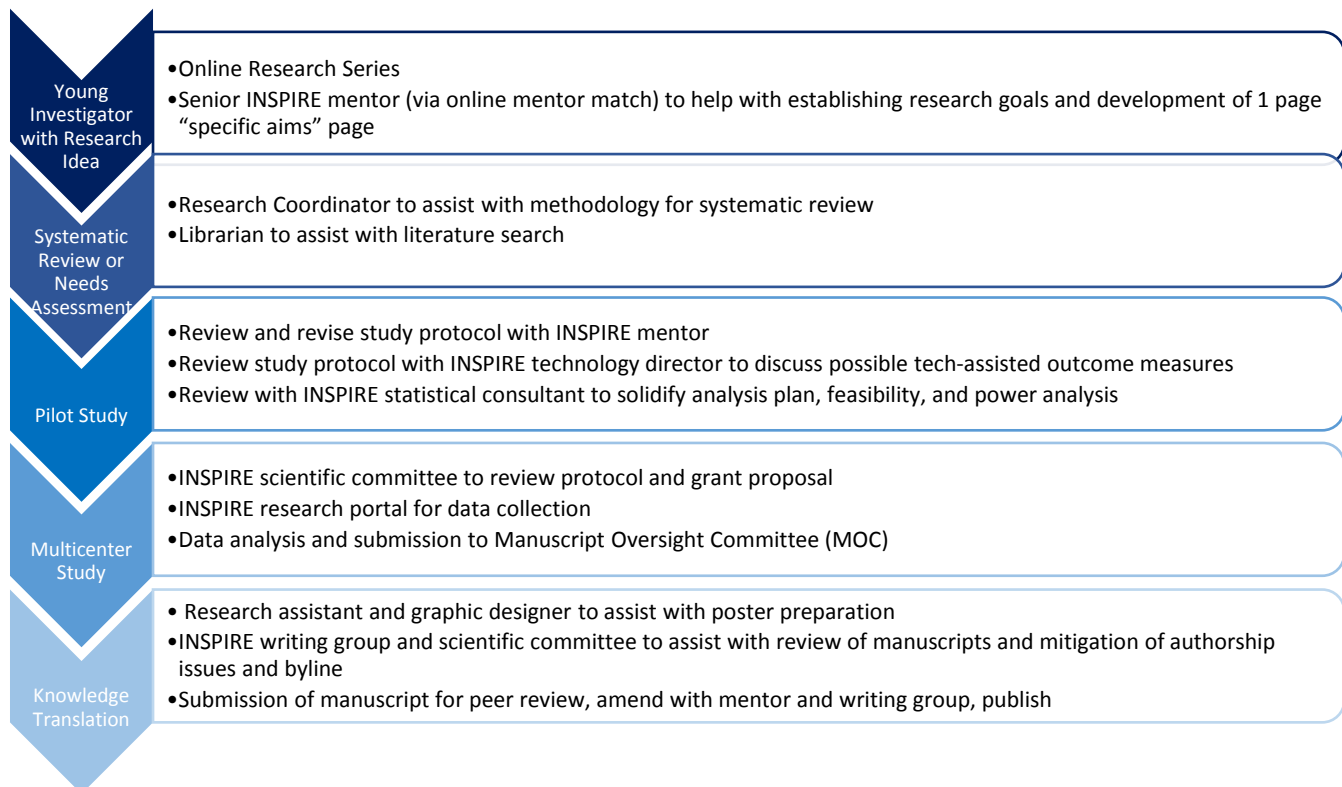

If you would like to make a donation to the INSPIRE Network please e-mail:
INSPIRESimulationNetwork@gmail.com

Research Process and Network Support Structure

Investigators are encouraged to begin their work by (1) submitting an ALERT presentation that is a brief description of their idea. Next, (2) the investigator is paired with a mentor and provided the “lay of the land” of ongoing research in that area to promote collaboration across projects. The investigator then conducts a (3) systematic review of the literature and plans an initial pilot study. The (4) pilot study methods are reviewed by the INSPIRE executive and shared with the network to recruit collaborators for a subsequent collaborative study. (5) The executive helps to facilitate

multicenter studies with IRB templates, scope of work templates, data use agreements, collaborative oversight and clear expectations from the start. INSPIRE can also provide specialty consultation with leading experts in biostatistics, educational research, technology and psychometrics. When the team has completed their work, (6) the manuscript oversight committee provides a pre-review of the work product and guidance on submission for publication. Additionally, (7) for selected projects the executive helps to provide letters of support for grant submission. In exchange for this support the INSPIRE investigator provides acknowledgement of INSPIRE in any presentation/publication and support for the INSPIRE administration on grants. See Figure for details.

Figure 2: INSPIRE Research Process and Network Support Structure

INSPIRE Research Themes

INSPIRE has conducted a series of consensus conferences to identify themes of inquiry within pediatric simulation. This framework will guide our network’s focus.

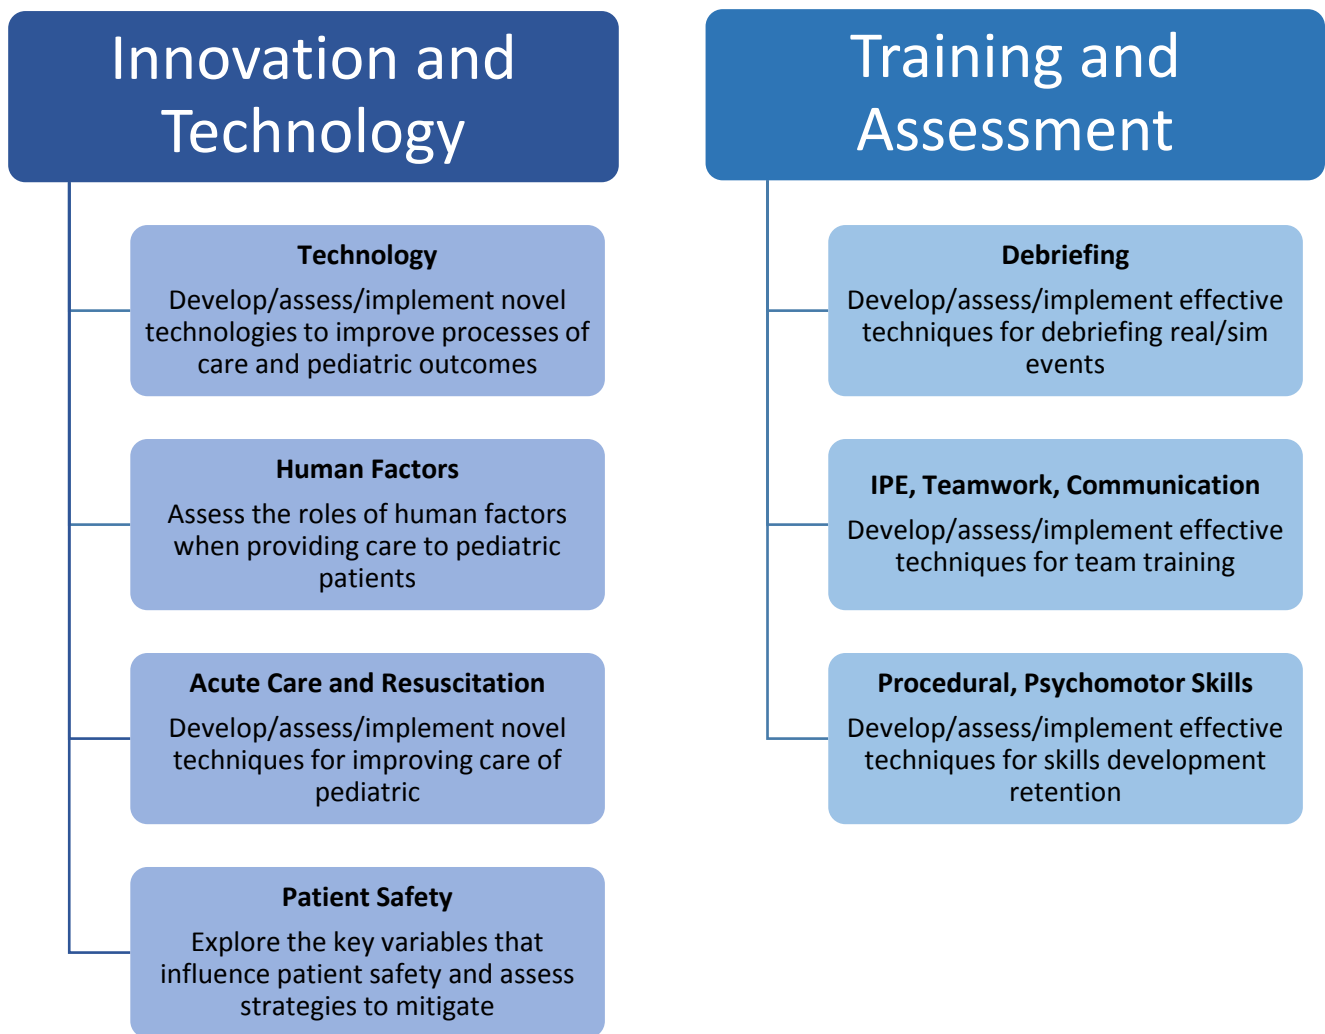

Figure 3. INSPIRE Research Themes

INSPIRE Projects

INSPIRE Projects Presented in 2017

Project	Lead Investigator	Lead Institution	Description	Current Status
<i>Using Cognitive Task Analysis to Understand the Decision-Making Process for Pediatric Blunt Abdominal Trauma</i>	<i>Tania Ahluwalia, Serkan Toy & Chris Kennedy</i>	Children's Mercy Hospital, Kansas City	Single site qualitative study. Interview experts from Pediatric Emergency Medicine and Pediatric Trauma Surgery. Use CTA to outline clinical decisions. Create an algorithm to be used as a tool for teaching through simulation and/or serious video games.	Formulating an algorithm and contacting experts nationally from for review
<i>Simulation as a strategy for learning in pediatrics graduate in a high complexity hospital. Intervention Study</i>	<i>Raúl N., Bordogna A., Costa G., de Echave JL.</i>	Centro de Simulación Clínica Hospital EL Cruce Florencio Varela, Argentina	Measure improving knowledge and technical/ nontechnical skills by pre and posttest and simulation checklist.	In development.
<i>Validating a Serious Games strategy to improve multi-patient care in Emergency Departments</i>	<i>Todd Chang</i>	Children's Hospital Los Angeles	Is there a dose-response relationship between game-based training and multi-patient care ability?	In development.
<i>Interdisciplinary Pediatric Sedation Provider Course Toolkit</i>	<i>Nancy Crego, and Corrie Chumpitazi</i>	Duke University School of Nursing & Society for Pediatric Sedation (SPS)	Develop, test, & evaluate a pediatric sedation provider course toolkit: including interdisciplinary team communication with Team Steps & evidence based sedation safety practices via on-line content and in-person simulation course	In development.
<i>SecureTube Study in the Simulated Setting</i>	<i>Girish G. Deshpande</i>	University of Illinois College of Medicine	Compare the flow characteristics and intubation experience of SecureTube with traditional ET (with same inner diameter) in simulated settings.	In development.
<i>CONsolidating Tools for OUtcomes in Resuscitation (CONTOUR)</i>	<i>Jonathan Duff</i>	University of Alberta, Stollery	Integrate the knowledge-based and team-based cognitive aids, in order to delineate the synergistic effect	In development.

		Children's Hospital	of integrating the CARD system with knowledge-based cognitive aids or "reader."	
<i>EPIC and Disaster Triage</i>	<i>Isabel Gross</i>	Yale School of Medicine	EPIC-assisted triage via mobile App in the field. Triage level assignment, picture of injury taken. Registration into EPIC in the field	Study Complete.
<i>RCDP as a method to improve airway management skills</i>	<i>Isabel Gross</i>	Yale School of Medicine	Is feedback with reflection "in action" with "rewind" (allowing learners to repeat action) superior to reflection "on action" without "rewind" when teaching procedural skills?	Study Complete.
<i>Improving knowledge and confidence of emergency residents in pediatric resuscitations through a pediatric resuscitation simulation curriculum</i>	<i>Scott Herskovitz, Maybelle Kou, Sonal Batra</i>	Inova Children's Hospital, George Washington University	Implementation of a pediatric resuscitation curriculum.	In development.
<i>Making simulation training stick with rapid cycle deliberate practice: Does interleaved various scenarios versus single progressive scenario improve long term retention of pediatric resuscitation skills?</i>	<i>Melissa Powell</i>	Johns Hopkins All Children's Hospital	Longitudinal prospective cohort (team) study. Post- test and retest study.	In development.
<i>Development of an Electronic Decision Support Tool to Optimize Performance during Pediatric Resuscitations</i>	<i>Priti Jani</i>	The University of Chicago Comer Children's Hospital	Development of a pediatric resuscitation decision support tool for IHCA.	In development.
<i>Use Of A Defined Role/Responsibility Chart And A Color-Coded Floor Code Map As An Innovative Tool To Improve Role Clarity During In-Situ Simulations</i>	<i>Mona Khattab</i>	Baylor College of Medicine, Texas Children's Hospital, Houston	Create a "Roles and Responsibilities" chart for each team member role. Patient positioning during a code; head at foot of bed vs. side of the bed.	In development.

INSPIRE NETWORK REPORT

2016-2017

<i>A Handover OSCE to Measure Skills in Transitions of Care</i>	<i>Joseph Lopreiato and Kathleen Wortmann</i>	Uniformed Services University	Introduced a handover station into annual pediatric intern clinical skills examination (CSE). Pediatric interns over three academic years from two different pediatric training programs in the USA. The assessor used a previously validated 10 item observation tool to measure performance after all three cases had been presented (IPASS SCO).	In development.
<i>A prospective study investigating measurement of biometric parameters of critical care practitioners during simulation events using the wearable performance tracking device known as Hexoskin™</i>	<i>Rob Parker</i>	DuPont	Describe the biometrics of critical care practitioners in real and simulated stressful environments	Simulation study of Peds vs EM; Code Leader vs Participant completed. Manuscript in progress.
<i>Throughput, cost and standardization: Does a serious game in healthcare work for teaching parents and clinicians neuro assessment in children with VP shunt?</i>	<i>Melissa Powell</i>	Johns Hopkins All Children's Hospital	Evaluate the usability and effectiveness of the Serious Game with a group of approximately xx parents or guardians of affected children and approximately yy pediatric nurses who could potentially be required to recognize VPS failure.	In development.
<i>Virtual Reality Simulation Training in Pediatric Resuscitation- The New Frontier</i>	<i>Joshua Sherman and Todd Chang</i>	Children's Hospital Los Angeles	Can we train, teach, practice and assess pediatric resuscitation medicine in a 360/ 3D fully immersive environment?	In development.
<i>Pediatric and Med-Peds Resident Resuscitation Quality Improvement</i>	<i>Cena Tejani, Shamyra Farrukh</i>	Newark Beth Israel, Children's Hospital of NJ	Pediatric mock code simulation program.	In development.
<i>The utilization of just-in-time simulation in optimizing the quality of rapid response calls and resident contingency planning</i>	<i>Taylor Wheaton, Kheyandra Lewis, Emmanuelle Topiol, Sharon</i>	St. Christopher's Hospital for Children, Philadelphia, PA	In Pediatric residents at St. Christopher's, do six months of weekly just-in-time simulation improve the quality of rapid response calls and of contingency planning on written handoff	Final data analysis is underway. Discussions for multi-institutional collaboration.

	<i>Calaman</i>		document.	Potential expansion to critical care services.
<i>Performance-based Competency in Interpreting Pediatric MSK Radiographs</i>	<i>Martin Pusic</i>	New York University	Prospective calibration cohort study to generate item difficulty ratings using IRT	In development.
<i>Multisite outreach simulation education to improve premature infant admission temperatures</i>	<i>Bobbi J. Byrne MD, Alana Barbato MD</i>	Indiana University School of Medicine	Project proposal under revision.	In development
<i>Cultural Prototypes and Differences in Simulation Debriefing</i>	<i>Francis Ulmer</i>	Insel University Hospital Bern, Switzerland	Cross-sectional survey study of experienced simulation debriefers worldwide (convenience sample).	In development.

INSPIRE Projects Presented in 2016

Project	Lead Investigator	Lead Institution	Description	Current Status
Team Leadership During Neonatal Resuscitation	Noorjahan (Nora) Ali	University of Colorado – Children’s Hospital of Colorado	Over 12 months we aim to improve identification of team leader during actual resuscitation in CHCO NICU from 51% to 80% through the use of educational methods that focus on key elements of team leadership.	In development
The impact of telemedicine on teamwork, communication, and clinical performance: a randomized controlled trial	Lucas Butler	Yale School of Medicine	To compare teamwork and communication as well as clinical performance between teams with telepresent vs. bedside team leaders during simulated pediatric resuscitations.	Manuscript Submitted
In situ Simulation Education For Families of Chronically Ill Survivors of Critical Illness	Sandeep Gangadharan	Cohen Children’s Center	To provide education to caregivers to improve quality of life for children who are chronically ill.	In development
In situ Simulation to Detect Latent Safety Threats in Process of Critical Care	Sandeep Gangadharan	Cohen Children’s Centre	To develop a safe transport system for critical care transport.	In development

INSPIRE NETWORK REPORT

2016-2017

Transport				
Rapid Cycle Deliberate Practice as a Method to Improve Airways Management Skills in Pediatric Residents.	Isabel T Gross	University of South Florida	Methods need to be identified to optimize instructional simulation design to achieve goals of the simulation learner. RCDP as a method of simulation debriefing has been show to improve pediatric resident resuscitation skills. Micro-debrief with reflection-on-action “pause and discuss/rewind” as a form of post-event debriefing may be differentiated from micro-debriefing with the event with reflection-in-action.	Study Complete.
Improving Success Rates of Neonatal Lumbar Punctures Through Positioning	Scott Herskovitz	Inova Children’s Hospital	Recent studies with ultrasound demonstrate that the greatest interspinous space achieved was in seated position with flexion of hips. Decreased o2 saturations most notable in the lateral decubitus position with knees to chest. Success amongst novices range from 35 – 50%.	In development
PALS on Demand in Skill Training	Hye-Young Jang	The Center for Simulation, Advanced Education and Innovation at the Children’s Hospital of Philadelphia	“PALS deconstructed” study showed on the job/in situ training program was not inferior to conventional PALS recertification. Heartcode can cover cognitive knowledge skills education and testing. Resuscitation Quality Improvement (RQI) care is developed to frequently provide PALS psychomotor skills. On the job/in situ simulation and post-event debriefing can cover communication/teamwork skills.	In development
A Prospective Study Investigation the Measurement of Biometric Parameters of Critical Care Practitioners in Various Clinical Scenarios Using the Wearable Performance	Nicholas Slamon	Nemous/duPont Hospital for Children	The measurement of biometric parameters in critical care physicians in various work scenarios has never before been reported. This study hopes to first describe the biometrics of critical care practitioners in simulated	manuscript preparation in progress

INSPIRE NETWORK REPORT

2016-2017

Tracking Device Known as Hexoskin.			stressful environments and explore if biofeedback can alter those parameters	
Teaching Infant CPR in the Pediatric Emergency Department	Joo Lee Song	Children's Hospital Los Angeles	No prior study has been conducted that looks at VSI (video self-instruction) infant CPR training completed in a pediatric emergency department setting. Laypersons may learn BLS in 24 minutes vs. 6 hour course.	Completed ED enrollment. Continuing Inpatient enrollment.
Factors Associated With High Quality Pediatric Care by Paramedics Using In-situ Simulation	Barbara M Walsh	Cohens/Hofstra, UMASS	Paramedic protocols differ from state to state. EMS groups vary widely in composition and experience. Exposure to critical events is low frequency/high stakes. Pediatric training is limited but highly desired.	In development
Improving Pediatric Acute Care in Community EDs Through Collaborative Simulation	Travis Whitfill	Yale University	This project provides elucidated areas for improvement at both provider and systems level. This proposal is to leverage these findings to serve as a needs assessment to inform the development of an effective low cost pediatric resuscitation improvement program (PRIP) compared to PECC alone.	In development

INSPIRE Projects Presented in 2015

Project	Lead Investigator	Lead Institution	Description	Current Status
The use of Leaderboards & Competition to improve self-initiated CPR training	T. Chang	Children's Hospital Los Angeles	International, multi-institutional randomized control-crossover study examining the effect of a competitive leaderboard on usage frequency and performance on simulated CPR skills.	Study Complete. Manuscript submitted.
Resuscitating Teamwork and Safety Using Acute Event Debriefing	M. Moga	Ann & Robert H. Lurie Children's	Nurse-led, acute event debriefing for patients suffering cardiac arrest in the ICU.	In development.

INSPIRE NETWORK REPORT

2016-2017

		Hospital of Chicago		
The effect of summative feedback on the accuracy of provider perceptions and the quality of CPR during a simulated pediatric cardiac arrest	L. Brown	University/ Hasbro Children's Hospital	CPR certified healthcare providers; 1) summative feedback re: quality of CPR; 2) HCP with no summative feedback. Test improved quality of CPR and improved accuracy of HCP perceptions.	In development.
The use of Leaderboards & Competition to improve High School CPR training	R. MacKinnon	Royal Manchester Children's Hospital	Examining the effect of a competitive leaderboard on usage frequency and performance on simulated CPR skills in highschools.	Study Complete. Manuscript submitted.
Integrating Cognitive Aids (INCA)	D. Bould	Children's Hospital of Eastern Ontario, University of Ottawa	Use of knowledge-based cognitive aids in interprofessional teams.	PSI funding received. Recruitment.
Pediatric Simulation in Rural India: PedSRI Study	S. Thyagarajan	PediSTARS India	Develop a structured Simulation training program to address recognition, stabilization and transfer to a higher centre & study the impact on patient outcomes.	In development.
NRP eSimulation	A. Ades	Children's Hospital of Philadelphia	Comparison of eSim to video review to no training after initial NRP course for enhancing retention at 6 months.	Enrolling participants.
Measurement of Stress Levels in Simulation and the Impact of Stress on Performance: Announced Versus Unannounced Simulation Based Training	S. Lyons	Bristol Medical Simulation Centre	Measuring Impacts of stress on performance, and physiological and biochemical changes associated with the stress response using announced versus unannounced simulation based training.	In development.

INSPIRE NETWORK REPORT

2016-2017

Development of a Pediatric Simulation Curriculum and Database Collaborative	T. Stavroudis	Children's Hospital Los Angeles	To form a pediatric simulation curriculum collaborative to establish a core group of educators and simulationists to build a credentialed, centralized pediatric simulation scenario platform and database that utilizes the ABP Board Content Specifications and ACGME Core Competencies and Developmental Milestones as the core principles of the curriculum.	Establishing infrastructure and identifying grant sources.
Script Assisted Feedback to Educate (SAFE Tool)	E. Sigalet	Sidra Research and Medical Center	Testing the SAFE tool to support debriefers in using a structured approach with all forms of feedback to optimize learning.	Research design in development.
Improving the quality of team training and performance during interprofessional in situ mock code blue simulations: A randomized controlled mixed-methods study	C. Walsh	Hospital for Sick Children	Comparing just in time training to no training for interprofessional teams in mock in-situ code blue simulations.	Data collection complete. Manuscript preparation in progress.

INSPIRE Projects Presented In 2014

Project	Lead Investigator	Lead Institution	Description	Current Status
Improving Basic Life Support and Outcomes from Cardiac Arrest: Implementation and Evaluation of the American Heart Association's Resuscitation Quality Indicator (RQI) CPR Training Program	A. Cheng	Alberta Children's Hospital	The objective of this study is to evaluate the effectiveness of the AHA's RQI program when compared with traditional annual BLS recertification (for pediatric healthcare providers).	Study Complete. Published.
Development of simulation-based assessment tools for the general pediatrics milestones	L. Mallory	Maine Medical Center	Will use a modified Delphi method with group of pediatric simulation experts and program directors to identify priority areas for simulation-based assessment aligned with the ACGME Next Accreditation System Pediatric	Study Complete. Published.

INSPIRE NETWORK REPORT

2016-2017

			Specialty Milestones.	
Use of Simulation in Limited Resource Countries. How can it be done?	D. Moro-Sutherland	Texas Children's Hospital	Two projects have come out of the original presentation during the INSPIRE meeting at IMSH 2014. 1. Education through low-cost simulation in the global health arena 2. Use of Simulation in Limited Resource Countries: How can it be done?	1. Low cost sim repository housed b/w Open Pediatrics & IPSS. 2. Low cost sim cases written. Pilot in Feb 2016. Incorporate sim into curriculum by summer 2016.
Handheld High Fidelity Simulation Training For IV Catheterization	D. Weiner M. Ottensmeyer	Boston Children's Hospital/Harvard Medical School	Build/use handheld high fidelity haptic simulation training device to teach PIV catheterization anywhere, anytime independent of infrastructure. Plan to compare to traditional methods of learning i.e. IV arm, instructor.	INSPIRE multicenter study in planning stage.
The effect of random leader role assignment on task and team performance during CPR	S. Ambati	Cohen Children's Medical Center of NY, NSLIJ	The main aim of this project is to show pre-designated leader role will improve team performance and to see whether physician or the nurse in the leader role will make a difference. Intervention-groups that has pre-designated leader role. Control – No leader role.	Recruitment in progress.
A Virtual Pediatric Simulator (VPS) For Emergency Scenario Training of Military Medical Personnel	J. Gerard	Saint Louis University	Project funded by the ONR to develop a game-based virtual reality simulator for training on high-stakes pediatric emergency medicine scenarios.	Game completed. Multicenter study completed, publication accepted.
Resuscitation Review to Guide Educational Interventions	A. Ruscica D. Kessler	Morgan Stanley Children's Hospital, Columbia	Pediatric Emergency medicine practitioners will identify a variety of key points learned or reviewed during resuscitations they have been involved in. These key points	Study Complete.

INSPIRE NETWORK REPORT

2016-2017

		University, New York	identified during resuscitations will be areas that the rest of the pediatric emergency staff would like more education on and identify as low self-efficacy topics.	
Improving realism of PALS-courses with smart simulation tools & children	W. Burkhard et al	PSRCS Pediatric Simulation Research Collab. Southtyrol	Currently only use BLS and ALS mannequins during PALS courses. Introduce tablet patient monitors an all PALS stations. Use of real sound sequences on 2 of 3 practical stations comparing learning outcomes of students in differently equipped teaching stations. Integration of real children. Change of skin color.	Research protocol in development.
Simulation using the PECARN Head Trauma Rule to Reduce CT Imaging	K. Ching	New York Presbyterian Hospital – Weill Cornell Medical Center, Mount Sinai Hospital	Limiting unnecessary CT scans for children with head trauma. PECARN clinical prediction rule helps identify children with very low risk for TBI (Traumatic Brain Injury). Objective of this trial is to develop a pediatric simulation exercise illustrating the use of the PECARN clinical prediction rule.	Second year of pilot study is complete. Now enrolling subjects for multi-center prospective randomized control educational intervention study involving 6 sites.

INSPIRE Research Project Funding for INSPIRE Network Members from 2015-2017

Year	Project and Funding Agency
2017-2020	The Health Education Neuroassessment Laboratory (THENaL) With: Adam Cheng (Co-I), Alberta Children's Hospital Funded by: John R Evans Leaders Fund, Canada Foundation for Innovation \$380,000 CAD
2017-2020	<i>Improving Cardiac Arrest Outcomes with Resuscitation Research (iCORE): Exploring the role of data-informed debriefing, digital charting, and situational awareness</i> With: Adam Cheng (PI), Alberta Children's Hospital Funded by: Alberta Children's Hospital Research Institute and the Alberta Children's Hospital Foundation \$346,000 CAD
2017-2019	<i>Analysis of variables contributing to bystander CPR rates in out-of-hospital cardiac arrest</i> With: Adam Cheng (Co-I), Alberta Children's Hospital Funded by: Heart and Stroke Foundation of Canada \$40,000 CAD
2017-2019	<i>Improving patient safety during pediatric resuscitation: team performance and error</i> With: Adam Cheng (Co-I), Alberta Children's Hospital Funded by: Maternal Newborn and Child Youth Strategic Clinical Network, Healthy Outcomes \$49,818 CAD
2017-2019	<i>ImPACTS: Improving Pediatric Acute Care Through Simulation</i> With: Dr. Kamal Abulebda (PI), Dr. Travis Whitfill (Co-I), Yale University Funded by: Rbaby Foundation Grant \$150,000 USD
2017-2018	<i>Dynamic vs Static Images for Learning Intussusception Ultrasound interpretation</i> With: Dr. David Kessler (PI), Columbia University College of Physicians & Surgeons Funded by: Rbaby Foundation \$80,000 USD
2017-2018	<i>Improving Cardiac Arrest Outcomes with CPR Coaching</i> With: Adam Cheng (PI), Alberta Children's Hospital Funded by: Alberta Children's Hospital Research Institute and The Office of the Associate Dean of Research, Enhanced Bridge Funding Program, Cumming School of Medicine \$20,000 CAD
2017	<i>QCPR Feedback Trial: Comparison of different feedback methods during randomized pediatric resuscitation training</i> With: Dr. Michael Wagner (PI), Medical University of Vienna Funded by: Laerdal Foundation \$18,288 USD
2017	<i>Improving Pediatric Acute Care Through Simulation (ImPACTS)</i> With: Dr. Wendy Van Ittersum (PI), Akron Children's Hospital Funded by: Akron Children's Hospital Foundation Grant \$15,000 USD

INSPIRE NETWORK REPORT

2016-2017

2017	<p><i>Generalizing TESTPILOT</i> With: Dr. G. Jesse Bender (PI), Rita Dadiz (Co-I), Beverley Robin (Co-I) Funded by: Agency for Healthcare Research and Quality (1R18HS023460)</p>
2016-2017	<p><i>ImPACTS</i> With: Kamal Abulebda, Marc Auerbach (PI), Yale University Funded by: Indiana University \$120,000 USD</p>
2016-2017	<p><i>Evaluation of National Resuscitation Quality Improvement Implementation in the UK</i> With: Prof. Ralph MacKinnon (PI) Royal Manchester Children's Hospital Funded by Laerdal & British Heart Foundation £50,000 UK</p>
2016-2017	<p><i>Crisis Resource Management</i> Overall goal: To develop a massive open online course for "Crisis resource management" With: Dr. David Kessler (Co-investigator), Columbia University College of Physicians & Surgeons Funded by: Provost's Massive Open Online Course Request for proposal (PI: Moitra), Columbia University \$25,000 USD</p>
2016-2017	<p><i>An Adaptive Tutor for Improving Visual Diagnosis</i> With: Dr. Martin Pusic (PI), NYU School of Medicine Funded by: U.S. Department of Defense \$1.4M USD</p>
2016-2017	<p><i>Health Care by the Numbers Curriculum</i> With: Dr. Marc Triola (PI), NYU School of Medicine Funded by: American Medical Association \$1M USD</p>
2016-2017	<p><i>The use of rapid cycle deliberate practice in crisis resource management skill acquisition: a prospective pre-post interventional study</i> With: Adam Cheng (PI), Alberta Children's Hospital Funded by: Department of Pediatrics Innovation Grant, Cumming School of Medicine, University of Calgary \$12,600 CAD</p>
2016-2017	<p><i>Simulation-based regional training of pre-hospital first responders on infant delivery and stabilization</i> With: Drs. Melissa Carmen and Rita Dadiz (PDs), University of Rochester Medical Center Funded by: American Academy of Pediatrics District Education Grant \$1,000 USD</p>
2016-2020	<p><i>Improving the Safety of Pediatric Tracheal Intubations in ICUs</i> With: Dr. Vinay Nadkarni (PI), Children's Hospital of Philadelphia Funded by: 1R18HS024511 AHRQ</p>
2016-2019	<p><i>Advancing Family Centered Care and Quality Self-Assessment for Pediatric Resuscitation Readiness</i> With: Dr. Travis Whitfill (Co-I), Yale University Funded by: Health Resources and Services Administration in the United States \$250,000</p>
2016-2019	<p><i>Implementing Simulation Based Education in Managing Maternal Newborn and Child Health Emergencies in a Resource-Constrained Setting: A Global Health Initiative to Save Lives in East Africa (SIM for Life)</i> With: Dr. Adam Cheng (Senior Investigator), Alberta Children's Hospital and University of Calgary Funded by: ELMA Philanthropies Foundation \$1,089,602 CAD</p>

INSPIRE NETWORK REPORT

2016-2017

2016-2019	<p><i>Implementing Simulation Based Education in Managing Maternal Newborn and Child Health Emergencies in a Resource-Constrained Setting: A Global Health Initiative to Save Lives in East Africa (SIM for Life)</i> With: Dr. Adam Cheng (Senior Investigator), Alberta Children's Hospital and University of Calgary Funded by: Laerdal Foundation for Acute Medicine \$630,00 CAD</p>
2016-2019	<p><i>Improving Rural Pediatric Emergency Care Through Tele-Simulation</i> With: Dr. Jessica Katznelson (PI), Johns Hopkins University Funded by: AHRQ \$250,000 USD (costs per year)</p>
2016-2017	<p><i>Simulation-based regional training of pre-hospital first responders on infant delivery and stabilization</i> With: Dr. Rita Dadiz and Dr. Melissa Carmen (PIs), University of Rochester Medical Center Funded by: American Academy of Pediatrics District Education Grant \$4,000.00</p>
2016-2017	<p><i>Global development of CPR as a Life Skill for High School Leavers</i> With: Dr. Ralph MacKinnon (PI), Royal Manchester Children's Hospital, Central Manchester University Hospitals NHS Foundation Trust Funded by: Laerdal Foundation £12,000 GBP</p>

2016-2017	<p><i>Optimal Serial Training Frequency for Attainment and Maintenance of High-Quality CPR using Real-Time Automated Performance Feedback Combined with Verbal Feedback from a CPR Instructor</i> With: Rob Anderson (PI), Northern Ontario School of Medicine, Adam Cheng, Alberta Children's Hospital Funded by: Northern Ontario Academic Medicine Association, Clinical Innovation Opportunities Grant \$50,000 CAD</p>
2016-2017	<p><i>Enhancing Medicosurgical Manual Skill Learning with Transcranial Direct Current Stimulation</i> With: Adam Cheng (PI), Alberta Children's Hospital Funded by: Health Science and Medical Education Research and Innovation Grant, Office of Health and Medical Education Scholarship, University of Calgary \$9,915 CAD</p>
2016-2017	<p><i>A Simulation-based Intervention Teaching Illness Management Skills to Caregivers of Children with Adrenal Insufficiency: a Randomized Controlled Study</i> With: Vincent Grant and Adam Cheng, Alberta Children's Hospital Funded by: Department of Pediatrics Innovation Grant \$24,260 CAD</p>
2016	<p><i>Development of Simulation-Based Tools for the Assessment of Interprofessional Teamwork in Pediatric Residents</i> With: Leah Mallory (PI), Barabara Bush Children's Hospital, Zia Bismilla, SickKids, Pavan Zaveri, Children's National Health System, Tehnaz Boyle, Boston Medical Center, Wendy Van Ittersum, Akron Children's Hospital, Marjorie Lee White, Children's Hospital Alabama, Karen Mangold, Northwestern University Funded by: 2016 Maine Medical Center Educational Innovations Grant \$20,000 USD</p>

INSPIRE NETWORK REPORT

2016-2017

2016	<p><i>Connecticut Emergency Medical Services State Partnership Grant</i> With: Dr. Marc Auerbach (PI), Pina Violano (PI), Marcie Gawel RN (PI), Dr. Mark Cicero (PI), Yale University Funded by: HRSA: MCHB: EMSC SP Grant \$130,000 USD (costs per year)</p>
2016	<p><i>Disaster Preparedness and Response, CT Statewide Pediatric Disaster Coalition</i> With: Dr. Mark Cicero, Pina Violano, Marc Auerbach, James Parker, Yale University Funded by: American Academy of Pediatrics and Center for Disease Control \$5,000 USD(costs per year)</p>
2015-2018	<p><i>Consolidating tools for outcomes in resuscitation (CONTOUR)</i> With: Dr. Dylan Bould (PI), Dr. Sylvain Boet, University of Ottawa, Dr. Farhan Bhanjji, Montreal Children's Hospital, Dr. Adam Cheng, Alberta Children's Hospital and University of Calgary, Dr. Marc Auerbach, Yale University, Dr. Linda Brown, Hasbro Funded by: Physicians' Services Incorporated Foundation \$248,500 CAD</p>
2015-2018	<p><i>PALS RQI Pilot-Test of instructorless skills course delivery system for PALS training and maintenance of skills</i> With: Dr. Vinay Nadkarni (PI), Children's Hospital of Philadelphia Funded by: American Heart Association</p>
2015-2017	<p><i>In-hospital QCPR Competition: An International Leaderboard Study</i> With: Dr. Todd Chang (Collaborator), Children's Hospital Los Angeles Funded by: American Heart Association \$200,000 USD (costs per year)</p>
2015-2017	<p><i>North West School's development of a global CPR life skill's initiative</i> Prof. Ralph MacKinnon (PI), Royal Manchester Children's Hospital, Central Manchester University Hospitals NHS Foundation Trust Funded by: Enhancing Learning Environments for the support of NHS funded Healthcare education / Training programmes, Forerunner Fund, Health Education North West £75,000 GBP</p>
2015-2017	<p><i>Improving paediatric trauma care through targeted onsite simulation and crisis checklist implementation – "a child and hospital centred Paediatric Trauma Program"</i> With: Ralph MacKinnon (PI), Royal Manchester Children's Hospital, Central Manchester University Hospitals NHS Foundation Trust Funded by: Enhancing Learning Environments for the support of NHS funded Healthcare education / Training programmes, Forerunner Fund, Health Education North West £75,000 GBP</p>
2015-2017	<p><i>The Effect of a New Training Program on CPR Quality of Paediatric Healthcare Providers: A Randomized Trial with Economic Evaluation</i> With: Dr. Adam Cheng (PI), Alberta Children's Hospital and University of Calgary Funded by: The Royal College of Physicians and Surgeons of Canada, Medical Education on Research Grant \$50,000 CAD</p>
2015-2017	<p><i>Teaching and Assessing Cost- and Time-effective Patient Care using Serious Gaming Strategies</i> With: Dr. Todd Chang (PI), Children's Hospital Los Angeles Funded by: Stemmler Fund, National Resident Matching Program \$150,000 USD</p>

INSPIRE NETWORK REPORT

2016-2017

2015-2017	<p><i>Using leaderboards to improve CPR simulation practice among healthcare professionals</i> With: Dr. Todd Chang (PI), Children's Hospital Los Angeles Funded by: American Heart Association Western States Affiliates Grant-in-Aid \$140,000 USD</p>
2015-2017	<p><i>Leaderboards for Improving CPR Training in Schools</i> With: Dr. Ralph MacKinnon, Royal Manchester Children's Hospital Funded by: Health England Research Grant \$100,000 USD</p>
2015-2016	<p><i>Neonatal Intubation Competency Assessment Tool (NICAT): Development and Validation Study</i> With: Drs. Zia Bimsilla, Emer Fian, Catharine Walsh, University of Toronto Funded by: Canadian Pediatric Society Neonatal Resuscitation Program Grant \$25,000</p>
2015-2016	<p><i>Improving paediatric trauma care through targeted onsite simulation and crisis checklist implementation – a child and hospital centred Paediatric Trauma Program</i> With: Prof. Ralph MacKinnon (PI), Royal Manchester Children's Hospital, Central Manchester University Hospitals NHS Foundation Trust Funded by: Royal Manchester Children's Hospital £10,000 GBP</p>
2015-2016	<p><i>Optimizing Integration of CPR Feedback Technology with CPR Coaching for Cardiac Arrest</i> With: Dr. Adam Cheng (PI), Alberta Children's Hospital and University of Calgary Funded by: Heart and Stroke Foundation of Alberta Seed Grant \$45,000 CAD</p>
2015-2016	<p><i>Improving CPR Quality of Pediatric Healthcare Providers with Longitudinal Training and Real-Time CPR Feedback: A Randomized Trial with Economic Evaluation</i> With: Dr. Adam Cheng (PI), Alberta Children's Hospital and University of Calgary Funded by: Department of Pediatrics Innovation Grant \$24,932 CAD</p>
2015-2016	<p><i>Pilot Evaluation of a Novel CPR Feedback Device in PICU: Can We Improve the Quality of CPR we Deliver to Patients?</i> With: Dr. Adam Cheng (PI), Alberta Children's Hospital and University of Calgary Funded by: Department of Pediatrics Innovation Grant \$23,020 CAD</p>
2015-2016	<p><i>INSPIRE Network Training for Pediatric Emergency Care</i> With: Dr. David Kessler (PI), Columbia University College of Physicians & Surgeons Funded by: RBaby Foundation \$55,318 USD</p>
2014-2018	<p><i>Assessing Simulation in Pediatrics: Improving Resuscitation Events: KidSIM-ASPIRE Simulation Research Program Infrastructure Grant</i> With: Dr. Adam Cheng (PI), Alberta Children's Hospital and Dr. Vincent Grant, University of Calgary Funded by: Alberta Children's Hospital Research Institute, Alberta Children's Hospital Foundation and Department of Pediatrics Research Grant \$150,000 CAD</p>

INSPIRE NETWORK REPORT

2016-2017

2014-2018	<i>Pediatric Cardiac Arrest and Resuscitation Quality (pedRES-Q) Collaborative Learning Laboratory</i> With: Dr. Vinay Nadkarni (PI), Children's Hospital of Philadelphia Funded by: Zoll Corporation and Foundation
2014-2017	<i>Computer-based simulation Pediatric disaster Triage Training for Emergency Medical Services Providers</i> With: Dr. Mark Cicero (Content expert on simulation-based instructional design) Funded by: AHRQ \$750,000 USD
2013-2017	<i>Infant Simulation Program for In-hospital Resuscitation Education - in the Delivery Room (INSPIRE-DR)</i> With: Dr. Vinay Nadkarni (Co-I), Children's Hospital of Philadelphia Funded by: R18 HS022469-01 AHRQ

INSPIRE Success Stories

The International Simulation Data Registry

Aaron Calhoun

The International Simulation Data Registry (ISDR) was developed in 2014 and has grown ever since. The ISDR archives data from cardiac arrest, difficult airway, and malignant hyperthermia simulations, which can then be used for programmatic benchmarking, quality improvement, and research. With 37 current member programs, the ISDR has archived data from over 750 individual simulation sessions. A publication describing the organization's development is currently undergoing peer review.

In late 2017, ISDR and INSPIRE executives formalized a partnership agreement between the two organizations. By doing so the leaders of both organizations hope to open up further avenues for collaborative research that directly improves the education we offer our trainees and ultimately improves the care of children worldwide.

Emergency Medical Services for Children (EMSC)

Marc Auerbach

ImpACTS (Improving Pediatric Acute Care Through Simulation) was created to ensure that ill and injured children receive the highest quality of emergency care whenever and wherever it is needed. In the US there are over 5000 general emergency departments and approximately 300 emergency departments dedicated to the care of only children. 90% of the 31 million children cared for in US emergency departments each year present to community emergency departments, where the majority of the patients are adults. Many of these hospitals may not be optimized to care for the sickest pediatric patients and/or have access to pediatric subspecialists. Through ImpACTS academic medical centers collaborate with one another and community hospitals to improve pediatric care. The program has expanded across the US, Canada and the EU to include over 80 hospitals, 160 teams and 1000 providers caring for over 1 million patients per year!

Our research data has demonstrated improvements in the structure and process of care. As we have grown ImpACTS has received communications from sites attributing our work to CHILDRENS LIVES SAVED! An example was a drowning patient who had a fully intact outcome after being cared for at a hospital engaged in our program. Similar SAVES have been reported for patients with sepsis, airway obstructions and seizures. While these are not "rigorous research" they invigorate our team each time we receive them (this is why we do what we do). Over the past year we have started work with a pilot set of hospitals to collect real patient outcomes data in a more structured way that we intend to expand across our network.

INSPIRE Abstracts (Poster, Oral), Workshops, and Presentations 2016-2017

1. Lin Y, Wan B, Belanger C, Hecker K, Gilfoyle E, Davidson J, Cheng A. Assessing PICU Mattress Compressibility with a Standard Backboard and Real-time Feedback: a Simulation-based study. Royal College Simulation Summit. Montreal, Canada. Nov 1, 2017.
2. MacKinnon RJ (Keynote Speaker) "Is your hospital ready to receive paediatric trauma FACT study" CEPS Conference Jonkoping University, Sweden, October 2017
3. Q CPR Feedback Trial: Comparison of different feedback methods during randomized pediatric resuscitation training IPSSW, Southampton, UK, 09/2017 - **Best Presentation Award**
4. Howard N, Pusic M, Rose R, Cook D. Learning Curves in Health Professions Education Research: A Systematic Review. Presented at: Association for Medical Education in Europe (AMEE) 2017 Symposium; 2017 August 26-30; Helsinki, Finland
5. Quirk M, Cutrer W, Pusic M, Gaglani S. Features of an Adaptive Learning Curriculum for Medical Education. Presented at: Association for Medical Education in Europe (AMEE) 2017 Symposium; 2017 August 26-30; Helsinki, Finland
6. MacKinnon RJ (Keynote Speaker) "Is your hospital ready to receive paediatric trauma FACT study" Countdown to Patient Safety, Lancaster University, UK July 2017
7. Kessler D, Duff J, Whitfill T, Gross I, Auerbach M. New reporting guidelines for simulation-based research in healthcare: how to write and report a simulation-based research study. Pre-conference Workshop, International Pediatric Simulation Society Workshop and Symposia. Boston, MA. 2017.
8. Walsh B, Auerbach M, Gangadharan S, Katz-Nelson J, Whitfill T, Hamilton M, Gawel M. Train the trainer: mobile simulation connecting academic & community sites to bridge gaps in care. Workshop, International Pediatric Simulation Society Workshop and Symposia. Boston, MA. 2017.
9. Biddell E, Estephan S, Nagy K, Van Ittersum W. Beyond Procedures: Designing a Comprehensive Boot Camp Experience. Workshop Presentation. International Pediatric Simulation Symposia and Workshops, Boston, MA, June 2017.
10. Van Ittersum W, O'Connell L. A Novel Approach to Increased Fidelity for Neonatal Circumcision. Poster: International Pediatric Simulation Symposia and Workshops, Boston, MA, June 2017.
11. Bismilla Z, Boyle T, Mangold K, Van Ittersum W, White M, Zaveri P, Mallory L. Development of a simulation-based interprofessional teamwork assessment tool for residents. Oral Presentation: International Pediatric Simulation Symposia and Workshops, Boston, MA, June 2017.
12. Pusic M, Kessler D. On the "Need for Speed": Pros and Cons of Using Speeded Practice in Simulation Education. Presented at: International Pediatric Simulation Symposia and Workshop (IPSSW); 2017 June 1-3; Boston, MA, June 2017.

13. Doughty CB, Welch-Horan TB, Villareal N, Pham N, Davis C, Patricia KE, Arnold JL, Rus M, Lemke DS. Rapid Cycle Deliberate Practice for Interprofessional Teams. Workshop presentation, 9th International Pediatric Simulation Symposia and Workshops, Boston, MA, June 2017.
